

Capabilities Statement

Wilson-Garner is a leading manufacturer of American-made custom fasteners.

Our family-owned and operated business produces the small quantity, custom bolts, screws, and studs you can't find anywhere else. Unlike larger manufacturers, every one of our jobs is manufactured to our customer's requirements, so we can deliver cold-formed bolts, screws, and studs that precisely fit your specifications.

We take quality seriously and maintain a small list of fasteners that we can produce to achieve your standards and ours. Because of this, we may not be able to make the part you're looking for at this time. Review our capabilities guide to get more information on the products we are and are not able to produce. If you have any questions on our capabilities, let us know: wilsongarner.com/contact.
